CONTENTS

NUMBER 1

Obituary

E. Barbier — 1 — Romano Celati

K. Pruess — 3 — Modeling of geothermal reservoirs: fundamental processes, computer simulation and field applications

G. Björnsson and G. Bodvarsson — 17 — A survey of geothermal reservoir properties

M. Hanano and Y. Sakagawa — 29 — Lateral steam flow revealed by a pressure build-up test at the Matsukawa vapor-dominated geothermal field, Japan

M. P. Hochstein, Yang Zhongke and S. Ehara — 43 — The Fuzhou geothermal system (People's Republic of China): modelling study of a low temperature fracture-zone system

C. Wada and H. Takahashi — 61 — Prediction of changes in elastic moduli due to water–rock interaction during operation of granitic HDR geothermal system

C. Thanassoulas and G. N. Tsokas — 77 — A geothermal field model based on geophysical and thermal prospectings in Nea Kessani (NE Greece)

H. Ben Dhia and N. Meddeb — 87 — Application of chemical geothermometers to some Tunisian hot springs

Geothermal News & Views

105 — The International Geothermal Association

110 — International Geothermal Association Charter

112 — Rules of the International Geothermal Association

116 — International Geothermal Association Bylaws

I — Software Survey Section

NUMBER 2

S. A. Henrys and M. P. Hochstein — 129 — Geophysical structure of the Broadlands–Ohaaki geothermal field (New Zealand)

J. W. Hedenquist — 151 — The thermal and geochemical structure of the Broadlands–Ohaaki geothermal system, New Zealand

M. P. Verma, S. P. Verma and H. Sanvicente — 187 — Temperature field simulation with stratification model of magma chamber under Los Humeros caldera, Puebla, Mexico

M. Hanano, M. Takahashi, Y. Hirako, H. Nakamura, S. Fuwa, J. Nose and R. Itoi — 199 — Longevity evaluation for optimum development in a liquid dominated geothermal field: effects of interaction of reservoir pressure and fluid temperature on steam production at operating conditions

J. Baudracco — 213 — Variations in permeability and fine particle migrations in unconsolidated sandstones submitted to saline circulations

M. Sekioka — 223 — Direct uses of geothermal energy in Japan

M. P. Tole — 233 — Present day ore deposition in the geothermal systems of Kenya—I. The Mwananyamala hot springs, northeast of Jombo Hill, Coast Province

241 — New Patents

NUMBER 3

D. A. C. Nicol and B. A. Robinson — 247 — Modelling the heat extraction from the Rosemanowes HDR reservoir

G. L. Scott — 259 — A fluid-inclusion investigation of the Tongonan geothermal field, Philippines

P. K. Jensen — 273 — Analysis of the temperature field around salt diapirs

S. K. Sharma, A. Seki, S. M. Angel and D. G. Garvis — 285 — Field testing of an optical fiber temperature sensor in a geothermal well

C. Thanassoulas and A. Lazou — 295 — Application of the SP technique over Lagadas low enthalpy geothermal field, Greece

309 — New Patents

I — Software Survey Section

NUMBER 4

A. Palacio — 311 — Effect of heat transfer on the performance of geothermal wells

P.-O. Grimaud, G. Touchard, D. Beaufort and A. Meunier — 329 — Pulsated flow regime in fractures: a possible explanation of local temperature gradients in hydrothermal systems

H. R. Westrich — 341 — Materials compatibility studies for the magma energy extraction project

R. Harrison, I. Hrolfsson and J.-S. Gudmundsson — 359 — Description and economics of "Hitaveita Akranes og Borgarfjardar" in Iceland

P. Cantini, A. Cataldi and E. Pinna — 367 — Gravity study of the structure of Suswa volcano and basement in the Kenya Rift

H. M. Bibby and A. W. Hurst — 385 — Tilt monitoring at Wairakei geothermal field

Geothermal News & Views — 397 — Faculty position in geothermal sciences

398 — Geoscience Information Society Annual Meeting

i — New Patents

iii — Software Survey Section

NUMBER 5

G. S. Bodvarsson, K. Pruess, C. Haukwa and S. B. Ojiambo — 399 — Evaluation of reservoir model predictions for the Olkaria East geothermal field, Kenya

M. Guidi, L. Marini, G. Scandiffio and R. Cioni — 415 — Chemical geothermometry in hydrothermal aqueous solutions: the influence of ion complexing

A. Rimi — 443 — Geothermal gradients and heat flow trends in Morocco

K. Akaku — 455 — Geochemical study on mineral precipitation from geothermal waters at the Fushime field, Kyushu, Japan

H. Alkan and A. Satman — 469 — A new lumped parameter model for geothermal reservoirs in the presence of carbon dioxide

NUMBER 6

R. O. Fournier — 481 — Double-diffusive convection in geothermal systems: the Salton Sea, California, geothermal system as a likely candidate

S. Arnórsson, S. Björnsson, Z. W. Muna and S. B. Ojiambo — 497 The use of gas chemistry to evaluate boiling processes and initial steam fractions in geothermal reservoirs with an example from the Olkaria field, Kenya

K. Kitaoka — 515 Water circulation rates in a geothermal field: a study of tritium in the Beppu hydrothermal system, Japan

M. Hanano and G.-I. Matsuo — 541 Initial state of the Matsukawa geothermal reservoir: reconstruction of a reservoir pressure profile and its implications

L. Zan, G. Gianelli, P. Passerini, C. Troisi and A. O. Haga — 561 Geothermal exploration in the Republic of Djibouti: thermal and geological data of the Hanlé and Asal areas

F. M. Gazo — 583 Lime treatment program: an alternative cooling water treatment program for geothermal power plants in the Philippines

591 New Patents
